| Guide to using this report

The Mentoria Basic consists of an Interest Assessment. It measures the degree to which you “like” activities of various kinds. This assessment is based on Holland’s Interest Scales – Realistic, Investigative, Artistic, Social, Enterprising and Conventional.

The interest report indicates your passion and likelihood of enjoying the kind of activities described in the respective domain. When we do things we like, we tend to invest greater effort and time in mastering it. When our professions are chosen based on our likes, we tend to feel happy and satisfied, rather than disinterested and stressed. Therefore, at Mentoria, we consider “interests” to be crucial for making career decisions!

It is important to remember that presence of high interest in something may not necessarily mean that you have the ability or skill to do things in that domain.

The career recommendations given in this report are a computer generated list based on your overall interest profile. It is important that you, in your discussion with the counsellor, arrive at a suitable list of 3-4 careers that best meet your interests and other relevant factors.

Interpreting The Score:

Your interest profile is based on a 9-point scale. Your counsellor will help you understand the meaning of your scores based on the scale given below

Broadly speaking,
Scores of 1, 2, 3 indicate low interest; 4, 5, 6 indicate moderate interest and Scores of 7, 8, 9 indicate high interest in the given domain.

Note: The results in this report are based on the responses that you have given on the online questionnaire. This is a psychometric report and needs to be interpreted with the help of a trained Mentoria Counsellor.
